

## Histamine release kit Whole blood samples

Ref: BA-E-1100

Intended for *in vitro* diagnostics & research use, this add-on to the <u>BA-E-1000 histamine ELISA kit</u> enables the measurement of histamine release in heparinized whole blood samples, allowing for instance to determine the sensitivity of basophilic granulocytes to specific allergens.

Sample type	500µl whole blood
Samples/kit	40 samples in duplicate
Sensitivity	0.2ng/ml
Range	0.5 - 50ng/ml
Assay time	Sample preparation (1h30)
Reactivity	Reacts with all species

### **INFORMATIONS**

Product overview	
Product name	Histamine release kit - Whole blood samples
Description	Supplementary kit to <i>in vitro</i> diagnostics enzyme immunoassay (ELISA) for the quantitative determination of histamine release in whole blood samples
Labels	IVD (EU Only) or RUO, CE
Format	96-well plate
Samples	500μl whole blood
Reactivity	Reacts with all species
Standard range	0 / 0.5 – 50ng/ml
Sensitivity	0.2ng/ml
Specificity	No significant cross-reactivity was observed with Histamine analogs such as 3-Methyl-Histamine, Tyramine, L-Phenylalanine, L-Histidine, L-Tyrosine, Tryptamine, 5-Hydroxy-Indole-Acetic Acid, Serotonin
Assay time	1h30 sample preparation + ELISA overnight
Storage	Store at 2-8°C for up to 6 months
Datasheets	Instructions for use, Material safety datasheet

www.immusmol.com Page 2

#### **PROTOCOLS**

Sample collection & storage	24-hours heparinized whole blood stored at 20-25°C
Sample preparation	Sample acylation (1h30)
ELISA	Histamine antiserum incubation (3H or overnight), revelation and read steps (1h)
Detailed protocol	Download instructions for use
