

# L-Glutamine Antibody – Rabbit Polyclonal

Ref: IS1060

This rabbit polyclonal antibody recognizes L-Glutamine at a 1/10 000 working dilution, while displaying no significant cross-reactivity with competitors such as L-Ornithine, L-Arginine and L-Asparagine. Using the [STAINperfect immunostaining kit A](#), this primary antibody could stain L-Glutamine in cell cultures, tissues sections and whole mounts.

### Affinity & specificity of anti- L-Glutamine antibody

Competitive ELISA demonstrates that low amounts of L-Glutamine conjugate are required to abolish antigen-antibody reaction (high affinity), while rising concentrations of L-Ornithine, L-Arginine and L-Asparagine (L-Glutamine competitors) do not affect reaction (high specificity).
